Social Services Team trained to provide the care needed to cope with life’s daily challenges and assist in the transition home by arranging individual multidisciplinary care conferences and discharge planning.

A unique feature of Bluffton Regional Continuing Care is the multidisciplinary Rapid Response Team. This medical team includes a registered nurse trained in critical care, an on-site physician, a respiratory therapist, a phlebotomist, and the registered nurse assigned to the resident. These medical professionals assemble quickly to provide rapid intervention when a resident’s health condition shows signs of change. The rapid response team is a proven best practice to improve residents’ outcomes.

If you or a loved one is planning a surgery that will require extended care, stop in for a visit and tour our facility or give us a call. We will be happy to answer your questions and look forward to the opportunity to serve you.

For more information about the benefits and services of the Bluffton Regional Continuing Care Center, call (260) 919-3170 or toll-free (888) 919-3557.
Our 13-bed unit is licensed by the State of Indiana and certified by Medicare to provide skilled nursing care. We are located on the first floor of the Medical Center with convenient and immediate access to services designed to prepare residents for transition home. Bluffton Regional Continuing Care Center offers a short-term stay – typically 14 to 30 days – designed to ease the transition from a hospital stay to home after the following events:

- Surgical procedures
- Hip fracture or replacement
- Knee replacement
- Cardiovascular difficulties
- Respiratory ailment
- Neurological impairment

We offer a comprehensive team of healthcare professionals who are focused on resident satisfaction and committed to improving the health of our residents. Members of our team include:

**Registered Nurses** focused on medication teaching and management, infusion therapy, diabetic care including glucose monitoring and education, and wound care

**Certified Nursing Assistants** specially trained in dementia and Alzheimer’s care and in providing assistance with the activities of daily living

**Qualified Medication Aides** specially trained in administration of medications and other treatments in a safe and organized manner

**Physical Therapists** who develop individualized plans to help residents improve mobility, prevent injury, increase endurance, and relieve pain

**Occupational Therapists** who set individualized goals to increase independence with activities of daily living such as personal care and households chores; they may also provide home safety evaluations if indicated

**Speech Therapists** who manage and treat swallowing disorders, treat to improve verbal communication, and administer memory challenge exercises to improve memory

**Registered Dieticians** who work with residents on an individual basis to promote healthy eating habits and to discuss how diet impacts recovery and prevention and treatment of future illness

**Respiratory Therapists** who work closely with the resident’s physician and nursing team to provide an individual plan of care to address breathing disorders
